

DAYBREAK COMMUNITY ASSOCIATION
ADDENDUM TO ARCHITECTURAL GUIDELINES

DOG RUN ENCLOSURES

Dog run fence enclosures must be wholly contained within a fenced yard.

Evergreen shrub screening must be planted on sides that are viewed from neighboring property.

Fence material must be black vinyl coated cyclone (chain link) fencing, limited to 6' in height.

A site plan showing the location of the proposed dog run enclosure, along with a drawing or product brochure of the dog fencing showing materials, dimensions and colors, and demonstrating compliance with these guidelines must be submitted prior to the construction or placement of the dog run enclosure. All dog runs are subject to review and approval by the Design Review Committee; however a complete plan demonstrating compliance with these guidelines may preclude the need for Committee review.

Reviewed and Approved by the Daybreak Design Review Committee on: August 18, 2005.

Approved by the Daybreak Community Association Board of Directors

ADOPTED: October 27, 2005
